* **Lightroom:** Lightroom is the professional's equivalent of Apple's Aperture. It supports all the Photoshop features, but it is also less expensive and easier to use. But if you want to change the look of a picture, Lightroom is the tool to use. * **GIMP:** Although very similar to Photoshop, GIMP is free to download, easy to use, and is not quite as sophisticated as Photoshop. If you're a do-it-yourselfer, this one is for you. * **Online photo editing sites:** This is probably the most common way to edit your images. For example, on iStock Photo, you can access the same tools that are found in Photoshop, plus tools designed to help you create templates for sharing on the Web. ## Working with Layers Modern image editors such as Photoshop and Lightroom are layered-based, so a new layer is always added to an image to apply a new edit. Also, a layer can contain a foreground or background color, text, a line, a path, a mask, or even a "saturation" mask. What's unique about layers is that you can apply one effect to a whole layer or you can edit an effect applied to a specific area. In the following figure, the layers are numbered 1 to 5. Three of the layers contain their own color, one contains text, and one has been masked. Layers 1 and 4 are set to multiply, so each pixel is darkened by a factor of two. Layer 3 is darkening only the portion of the layer that appears below the diagonal line. Layer 2 is tinted light green; it has no effect, since it's not set to be visible. Layer 5 is lightening (increased saturation), so it appears white instead of gray. Layers in Photoshop can be applied to an image as a single effect or as a group of effects. You can use the Layer Mask feature to hide, show, or modify the appearance of only a portion of the layer. The entire layer can then be deleted and added to the image again to create a new effect.

and, later, Melissa after Kevin's death. Her father eventually buried her in a cemetery on Long Island, although the film implies her ex-husband Tony was originally responsible for the move and eventual burial. Mary Sue had one of the most famous walks in cinema, as she carried Kevin's coffin for the entire film in an elaborate balancing act at the memorial for which they watched the footage from *The Long Goodbye* on the giant screen at their graveyard. Her attempt to "let go" at the end of the funeral required quite a bit of running, as her feet slipped out from under her. When the film concludes, the mob gets into a helicopter and her father drives off in a hearse. At one point she recalls an experience she had with him, asking, "Why, did you have a car accident?" He replies, "No, I had an affair. With a married woman." Ellen Barkin played her as a more jaded and sophisticated version. Mia Mia, a young woman introduced in the original film, is named after Walter William Mia, the man who purchased the rights to the novel a few days after it was completed. She met James when he was a high school student, leading a group of kids to his apartment and trying to seduce him by screwing on his pajamas. They subsequently fell in love, and the young lovers were easily swept up in the glamour and excitement of the mob's success. Jim took her out on the road with him as he sold sunglasses and pushed a milk cart, before she became part of the champagne-soaked crowd at Fat Sam's. After Pam and Nicky were shot, Mia helped Jim sneak out of town, taking a \$10,000 cash bribe from George at the airport with them. While Jim still had his doubts about his decision to quit, Mia urged him to continue, and even helped him find a job. In a flashback scene, Mia takes her boyfriend to meet his rich family in New Jersey, and when Jim wanted to leave, she said, "You don't get to make up your mind, you get to make up your mind when I get there." It was their last night together, as Jim was about to take the job with the crew on *The Streets of San Francisco*. Mia appears in an epilogue, in a cemetery where Jim has taken Kevin's coffin to be buried. She is holding out her hand to Jim, but he
